The **Tour AD DI** is our first shaft design that was integrated with Toray Company's original Nano-alloy material technology in the tip section of the shaft. This material technology has now come to be known as "**DI Technology**". This unique material technology promotes additionally shaft stability without the loss of feel and allows the player to create greater club head speed and thus greater ball speed while still providing exceptional feel and control.

The **Tour AD DI** also utilizes premium, aerospace quality 50t carbon-fiber materials to provide the best performing shaft available. The softer mid-section bend profile of the **Tour AD DI** allows the player to load the shaft properly, yet it maintains a firm enough tip section through IMPACT promoting a high launch and low spin ball flight condition. The result, the Tour AD DI delivers players to the next level in shaft performance and will create a "**DEEP IMPACT**" on your game!
