

YS NANO RELOADED

— DI TECHNOLOGY —

The **YS NanoReloaded** re-ignites a shaft brand model long known for performance and quality. In a quest to gain distance and maintain the similar performance characteristics as the YS+ series, the engineers at Graphite Design took the YS+ hybrid shaft profiles and combined them with the high performance, nano-alloy material technology of the Tour AD DI, also known as “**DI Technology**”, to create the new **YS NanoReloaded** hybrid shafts. Manufactured using premium carbon fiber materials the addition of the DI Technology provides the new **YS NanoReloaded** with additional stability without the loss of feel.

The **YS NanoReloaded** hybrid shafts are available in 75 and 85 gram weights in R, S and X Flex. They have a stiffer butt and slightly softer tip to mid-section than the previous version of YS+ Hybrids for improved performance in today’s modern hybrid heads.

MSRP \$99
