

# Tour AD DJ

The **Tour AD DJ** wood shaft model was designed and is manufactured exclusively at the Graphite Design factory headquarters in Japan. The **Tour AD DJ** is available in 50g R2(Lite), R1(Regular) and S flex, 60g SR(Stiff Regular), S and X flex, 70g S and X flex and 80g S and X flex.

The **Tour AD DJ** design features a much softer tip section and stiffer butt section than its big brother, the Tour AD DI. This softer tip bend profile is designed to promote mid/high launch angles with mid ball spin. Players with the Tour AD DI in their driver find the **Tour AD DJ** model to complement it well when used in fairway woods. Like similar Tour AD wood shafts, the **Tour AD DJ** utilizes premium, aerospace quality 50t carbon-fiber and the 1st generation of the Toray Nano-alloy material technology known as "DI Technology" for amazing feel and improved performance in Accuracy and Distance.

Revolutionary technology, design and the most advanced materials are trademarks in all Graphite Design shafts, making them the highest quality premium golf shafts on the market today. Validating the company's "Tour AD" logo, all of Graphite Design's PGA Tour-proven shafts are specifically designed to promote a gain in **A**ccuracy and **D**istance.
