

**Tour AD GT**

The **Tour AD GT** wood shaft model was designed and is manufactured exclusively at the Graphite Design factory headquarters in Japan. The **Tour AD GT** is available in 50g R2(Lite), R1(Regular) and S flex, 60g SR(Stiff Regular), S and X flex, 70g S and X flex and 80g S and X flex.

The **Tour AD GT** design is an overall softer tip and stiffer butt shaft yet it features an overall slightly stiffer bend profile than its brother, the Tour AD DJ, resulting in a higher kick point that produces a MID trajectory while maintaining optimal spin control. Like all of the premium Tour AD wood shafts, the **Tour AD GT** utilizes premium, aerospace quality 50t carbon-fiber and the 1st generation of Toray Nano-alloy material technology known as "DI Technology" for amazing feel and improved performance in Accuracy and Distance.

Revolutionary technology, design and the most advanced materials are trademarks in all Graphite Design shafts, making them the highest quality premium golf shafts on the market today. Validating the company's "Tour AD" logo, all of Graphite Design's PGA Tour-proven shafts are specifically designed to promote a gain in Accuracy and Distance.
